**Importance:** High

Please do not let the Insurance Company's greed end life as many, many, catastrophic Auto-related injury's - End. Lifelong injury's require lifelong rehabilitation, health care and health care aides to make people's quality of life worth living. This bill will end up causing the end of patients' lives and quality of life. It is hard enough living with our disability's as it is. Sham on the Insurance Companies that have anything to do with Bill and shame on any person that supports it...

Sincerely,

Robert J Needham
